FSL-Galili(tri)

FSL-GALILI(GALa3GALb4GLCNb)-SA1-L1

Catalogue Numbers **869960-1-R&D**

Unit size **1 mg**

Storage temperature below minus 10 °C

Product Description

FSL-Galili(tri) is a KODE™ technology construct designed to label hydrophobic surfaces including living cells with the ubiquitous animal antigen Galili. Human cells are Galili antigen negative. All KODE™ FSL constructs consist of three essential designable features; a functional component (F), a spacer (S), and a diacyl lipid (L).

FSL-GALILI(GALa3GALb4GLCNb)-SA1-L1 is comprised of the Galili trisaccharide Gal α 3Gal β 4GlcNAc β representing F, conjugated via an O(CH₂)₃NH spacer (SA1) to an activated adipate derivative of dioleoylphosphatidylethanolamine (L1). All FSL constructs disperse in biocompatible media and spontaneously and stably incorporate into cell membranes. Cells modified with KODE™ constructs are known as kodecytes¹ and usually maintain their normal vitality and functionality.

FSL-Galili(tri) has been specifically designed to create human cells (kodecytes) expressing controlled levels of the animal Galili antigen but can also be used to modify other hydrophobic surfaces including fixed cells and solid phase surfaces. This product can be used to modify Galili negative red cells to create kodecytes that can quantitate antibodies directed against the Galili antigen². These Galili-kodecytes will react with almost all human serum, the degree of reactivity determined by the level of antibody present (and level of FSL antigen inserted).

Precautions and Disclaimer

This product is for R&D use only, not for drug, household, or other uses. Please consult the Material Safety Data Sheet for information regarding hazards and safe handling practices

MSDS sheets and other technical information is available at kodebiotech.com/sales/order_home.php

End User License

This product is subject to the terms of an End User License – a copy of this license is available at kodebiotech.com/sales/order_home.php

Preparation Instructions

The product should be reconstituted at a concentration of 2 mg/ml in saline or PBS. Buffered solutions are preferred for long-term storage. Product should not be reconstituted in water unless for immediate use as product is unstable when stored in water. The 2 mg/ml Stock Solution can be frozen in aliquots for later usage. Thawed product should be briefly sonicated before use.

Stock Solutions can be diluted in buffers containing protein. Stock solutions should not be diluted in buffers containing lipids (e.g. serum) or other hydrophobic products as the FSL will associate with this material and insertion into cells will be reduced.

Storage/Stability

Store unopened product at below minus 10 °C
Store 2 mg/ml Stock Solution aliquots at below minus 10 °C and avoid repeated freezing and thawing of solutions.

Solutions in PBS, pH 7, can be stored at 2-8 °C for up to 2 weeks.

Product Profile

Cell labeling – Add 1 volume of FSL-Galili(tri) diluted in PBS (concentration up to 2.0 mg/ml) to 1 volume of cells. Incubate for 2 hours (range 1– 12 hours) at a temperature of 37 °C (range 4 - 37 °C) to allow molecules to spontaneously insert into cell membranes. Wash (may be optional). Store kodecytes in serum free media.

Rate of FSL insertion is primarily determined by FSL concentration, time and temperature.

FSL constructs will remain in active cell membranes for up to 12 hours and indefinitely in inactive membranes (such as red cells) in serum-free media.

FSL-GALILI(GALa3GALb4GLCNb)-SA1-L1 catalogue 869960-1-R&D is sold
for Research and Development purposes only
and is subject to the following End-User License

KODE™ Construct End User License (Non-Commercial Research Purposes)

KODE™ Constructs are supplied by KODE Biotech Materials Limited under license from KODE Biotech Limited. As the entity, which has purchased a KODE™ Construct, you have the non-transferable right to use the purchased KODE™ Construct for research conducted by you, for your own internal purposes, in accordance with the provisions of this document.

You may not use the purchased KODE™ Construct, or any composition comprising the purchased KODE™ Construct (including modified cells or "kodecytes"), for any commercial purpose.

'Commercial purposes' mean any activity for which you obtain a financial or in-kind benefit from another entity, including manufacture of products for sale or other disposition, and the conduct of research or other services for or on behalf of a third party or where a third party has any option or right of refusal over research outcomes.

Transfer to a third party is permitted where the third party is a genuine scientific collaborator and has agreed in writing to be bound by the provisions of this document prior to the transfer. You are responsible for ensuring that your personnel and scientific collaborators comply with the restrictions provided in this document.

Your purchase of the KODE™ Construct does not give you any license of, or interest in, any intellectual property rights of KODE Biotech Limited other than as may be necessary for your internal research as permitted by this document. The KODE™ Construct is supplied "as is" and neither KODE Biotech Limited nor the supplier gives any warranty that the purchased KODE™ Construct is fit for any particular purpose or that it has any particular qualities or characteristics.
